

GLADTECH 2024

June 11th & 12th

Gladwin's Milwaukee office will again be hosting a customer event, live-demos the latest in fabrication equipment from the worlds leading manufacturers - including several automation applications and multiple seminars!

130-3100 Ultra

- Multiple Safan electric press brakes
- Safan robotic mini-cell with tool changer

Robotic Mini Cell

LIVE DEMOS

GAD Automated Forming Cell

- 55 Ton Safan E-Brake with integrated Fanuc robot
- Robotic bending solution for any size project. "Custom is Standard"

Register for the show!

Daily Robotic Welding Seminars

8:30am - How to get into robotic bending.

12:30pm - New technologies & alternatives to sub-arc welding.

Barbaque lunch each day!

Always Solving!

DAIHEN Inc.

- (3) Robotic cells under power and running parts
- OTC The Global Leader in Robotic Arc Welding
- Entire welding solution is OTC! Welder, robot, material handling...ALL OTC

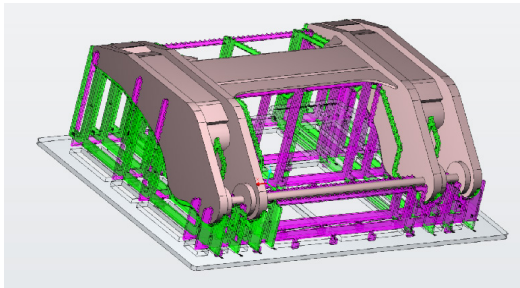

ECO-ARC 200

ECO-ARC 290

Accelerate your welding processes by creating jigs and fixtures faster.

LIVE DEMOS

The ULT Airtower for welding fume extraction with NO DUCTWORK

A.C.T. DUST COLLECTORS

High-performance industrial dust collectors come in many makes and models and are built with features to stand up to your rugged manufacturing environment.

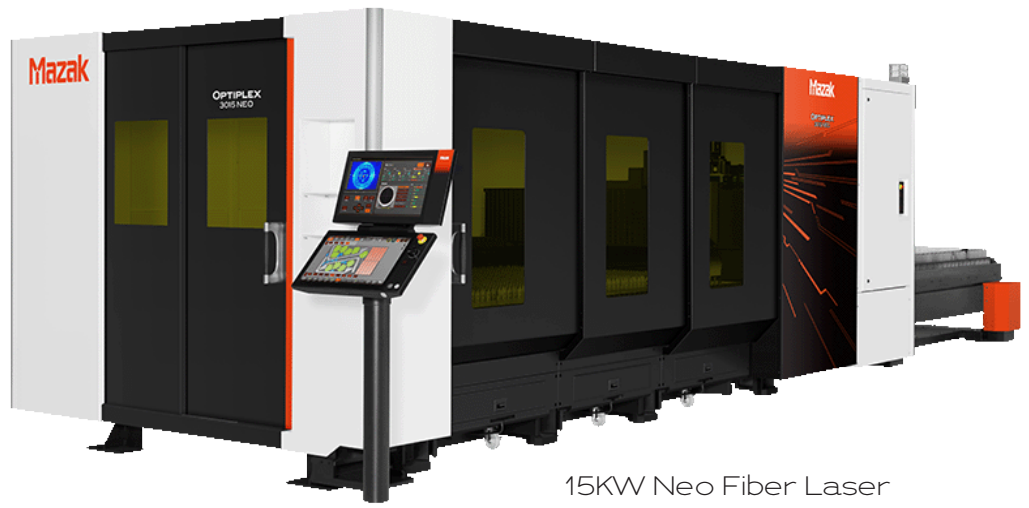

GLADTECH 2024 June 11th & 12th

Mazak

OPTONICS CORP.

- The next generation of high power fiber lasers with maximum control.

LIVE DEMOS

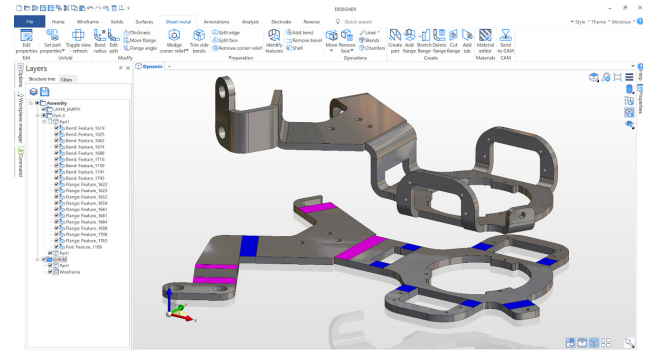

15KW Neo Fiber Laser

Liberty nitrogen generators, mixers and high performance air systems.

Vertically integrated software.

Accell E 250 Ton 9-Axis

ACCURPRESS

Great range of hydraulic press brakes with impressive features & options.

GLADTECH 2024
June 11th & 12th

Marvel®

- The most complete line of vertical saws in the industry.
- Full line of horizontal saws from both Marvel and Amada.

8-Mark-III

380 Automatic Saw

LIVE DEMOS

Haeger® a PennEngineering® Company

- World leader in hardware insertion technology.
- Robot Ready.

824 OneTouch Lite

TIMESAVERS®

32 WRB Series

- Industry leading metal finishing machines.
- 32 Series rotary brush machine offers deburring, edge rounding, oxide removal and slag removal on one machine.

DAVI

First completely electric plate roll series in the world.

SEE FOR THE FIRST TIME IN WISCONSIN

CNC Electric Plate Roll

SCHRÖDER GROUP

- Bi-Direction up/down bending makes forming easier.
- Automated systems with automatic tool changing and part handling.

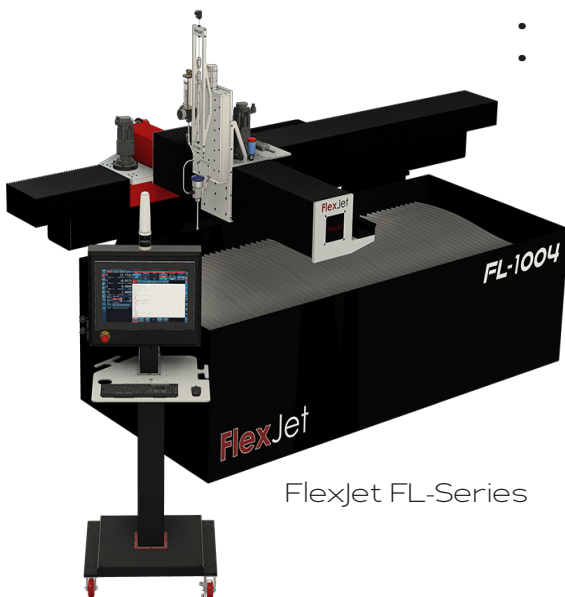

PowerBend Professional
CNC Bi-Directional Folding

LIVE DEMOS

Flex MachineTools

- Precision waterjet cutting Systems.
- Discover the E.P.I.C. advantage – Best in Class.
- Long bed vertical machining centers.
- 10' - 50' long, up to 10' wide.

FlexJet FL-Series

FlexCNC

LEMAS®

- Reliable Economical 3 and 4-Roll Hydraulic Plate Rolls.
- Standard productivity enhancing features.

LEMAS TR Series

ROPER WHITNEY

AB1014K

- CNC Folders & Shears for the Architectural Industry.
- Made in the USA – One Stop Shop.

10' Shear

LIVE DEMOS

Swift-Cut

- Global leader in affordable CNC Plasma Cutting Machines & WaterJets.
- Easy to use “one-click” Software.

Swift-Cut Pro Plasma

- Proven welding automated systems.
- Made in the USA.

LIVE DEMOS

Logitudinal Seam Welder

Scotchman

CE 50 Angle Roll TB60 Rotary Draw

Ironworker

CPO 350 Coldsaw

Aluminum Saw

- Full range Manual and Semi-Automatic Miter Band-saws
- High Speed Aluminum Saws and Machining Centers

Triton Miter Saw

GLADTECH 2024
June 11th & 12th

WDM

- USA manufactured plate rolls
- 3-roll, 4-roll angle rolls

Angle Roll

Plate Roll

LIVE DEMOS

Manufacturers Capital will be onsite to answer all your questions regarding equipment financing.

ALLtra cutting and welding systems deliver innovative features coupled with the latest technologies for plasma, oxyfuel, waterjet or automated welding applications.

Peddinghaus produces the toughest steel fabrication machinery in the world. Every hand-assembled machine is the gold standard for what structural steel fabrication equipment should be.

New Innovative Technology only just now available to the North American market providing capabilities such as:

- ANY length and width laser bed desired.
- Dual laser heads.
- Bevel laser heads.
- Cost reducing lasering of traditionally plasma cut parts.
- Machining, milling, drilling and tapping without all the pitfalls of current market offerings.

GLADTECH 2024
