Solving

32 WRB Series

- 32 Series rotary brush machine offers deburring, edge rounding, oxide removal and slag removal on one machine.

Great range of hydraulic press brakes with impressive features & options.

Machines and manufacturers at the show

- 55 Ton Safan E-Brake with integrated Fanuc robot
- Robotic bending solution for any size project.

"Custom is Standard"

8:30am - 4:00pm both days
Lunch each day from Robert's Meats

Register for the show!

DAIHEN Inc.

- (3) Robotic cells under power and running parts
- OTC The Global Leader in Robotic Arc Welding
- Entire welding solution is OTC! Welder, robot, material handling...ALL OTC

Gladwin Welding Division is a team of dedicated welding specialists, application experts and certified welding inspectors. Tasked with a mission to never let you fail by helping you to work through your welding process to find the best approach to weld complicated parts, improve speed or quality to your welds, add automation or improve the capabilities to your welding team. .

MITUSA Inc. is a highly qualified American based manufacturer of engineered, precision, fixed welding automation systems.

The ULT Airtower for welding fume extraction with NO DUCTWORK

Mazak
OPTONICS CORP.

- The next generation of high power fiber lasers with maximum control.

15KW Neo Fiber Laser

FLEX
MACHINE TOOLS

- Discover the E.P.I.C. advantage – Best in Class.
- Long bed vertical machining centers.
- 10' - 50' long, up to 10' wide.

FlexCNC

marvel®

- The most complete line of vertical saws in the industry.
- Full line of horizontal saws from both Marvel and Amada.

380 Automatic Saw

GLADTECH 2026
May 13th & 14th

130-3100 Ultra

- Multiple Safan electric press brakes
- Safan R-Brake

R-Brake

Advanced Plate Processing Systems

TECOI's THOR is the most versatile plate processing station on the market, allowing the production of parts with multiple operations such as milling, drilling, tapping, countersinking, marking, etc.

THOR

DAVI

First completely electric plate roll series in the world.

CNC Electric Plate Roll

Autobrake

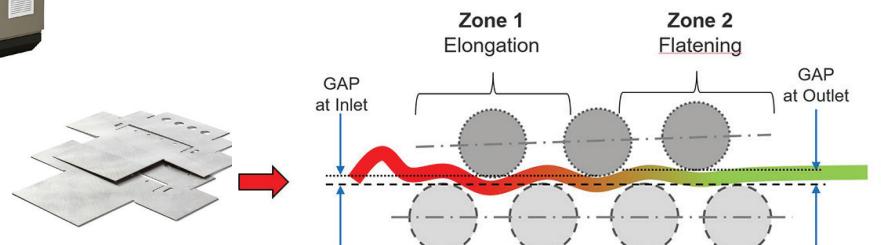

ROPER WHITNEY

Powered by an advanced CNC control system, the AutoBrake® sheet metal brake by Roper Whitney is capable of bending many types of materials and thicknesses with very little setup time and minimal tool changes.

KOHLER

Precisely level and relieve stress from sheets and part blanks. Your downstream production processes will benefit from higher quality flat parts reducing forming, fixturing and welding times dramatically. All while providing better finished parts!

SCHRÖDER GROUP

Schroeder Group is The World Leader in the manufacture of CNC Folding Equipment. They pride themselves in offering leading bending solutions for optimal sheet metal processing.

PowerBend Professional

Swift-Cut

CNC Plasma

Cutting-edge plasma cutting machines. Easy to use software in a Pro series for a more affordable solution, and the XP series for more robust applications.

STS SYSTEM

Tooling Racks

Liberty Systems®

Liberty nitrogen generators, mixers and high performance air systems.

Aluminum Saw

PMI

- Full range Manual and Semi-Automatic Miter Bandsaws
- High Speed Aluminum Saws and Machining Centers

FMB

Triton Miter Saw

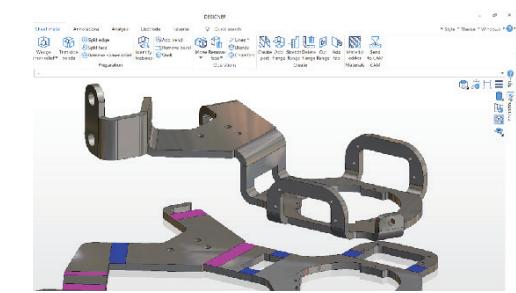

Scotchman™

Scotchman will have an ironworker, angle roll, ram bender and saw with gauge.

RADAN BY HEXAGON

Vertically integrated software.

UESCO CRANES®
