

GLADTECH 2026

April 15th & 16th

Always
Solving

GLADTECH is BETTER!

Personal discussions with technical experts at every corner

Over 35 Manufacturers
+25 Machines Running

Working the process
From a CAD drawing to a robotically welded, finished product.

Always
Solving

32 WRB Series

- 32 Series rotary brush machine offers deburring, edge rounding, oxide removal and slag removal on one machine.

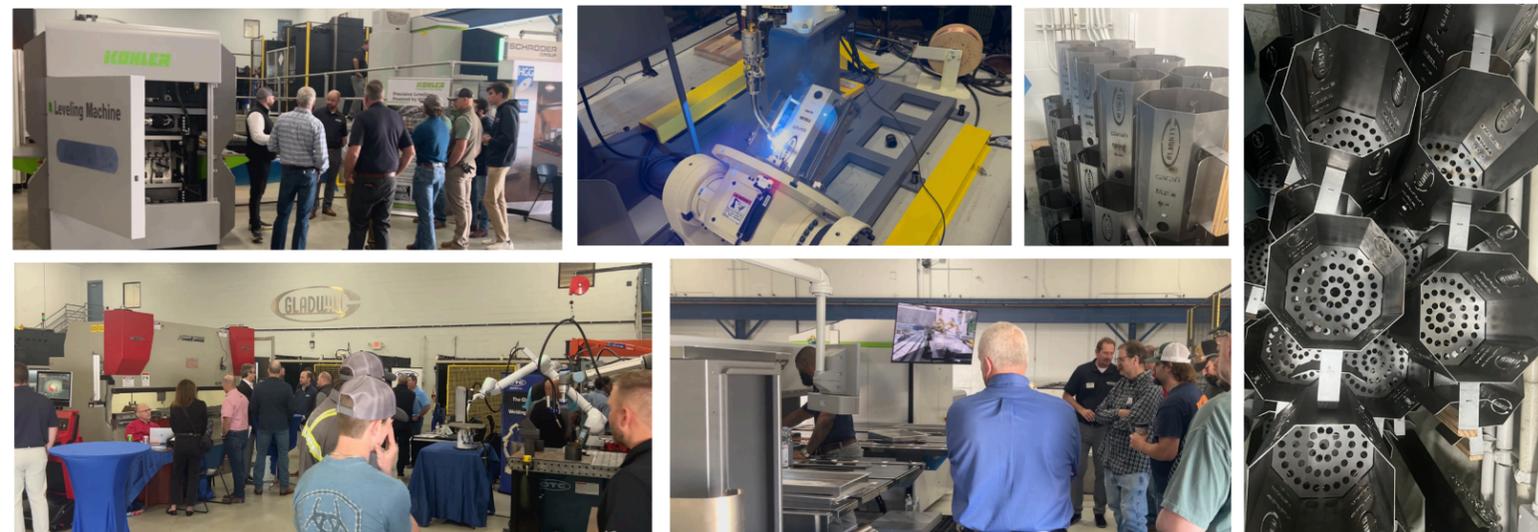

Great range of hydraulic press brakes with impressive features & options.

Machines and manufacturers at the show

- Safan E-Brake with integrated robot
- Robotic bending solution for any size project.
"Custom is Standard"

Register for the show!

8:30am - 4:00pm both days
Lunch each day!

GLADTECH 2026
April 15th & 16th

DAIHEN Inc.

- (3) Robotic cells under power and running parts
- OTC The Global Leader in Robotic Arc Welding
- Entire welding solution is OTC! Welder, robot, material handling...ALL OTC

ECO-ARC 290

Mazak OPTONICS CORP.

- The next generation of high power fiber lasers with maximum control.

20KW Neo Fiber Laser

Gladwin Welding Division is a team of dedicated welding specialists, application experts and certified welding inspectors. Tasked with a mission to never let you fail by helping you to work through your welding process to find the best approach to weld complicated parts, improve speed or quality to your welds, add automation or improve the capabilities to your welding team. .

FLEX

MACHINE TOOLS

- Discover the E.P.I.C. advantage – Best in Class.
- Long bed vertical machining centers.
- 10' - 50' long, up to 10' wide.

FlexCNC

MITUSA Inc. is a highly qualified American based manufacturer of engineered, precision, fixed welding automation systems.

Register for the show!

The ULT Airtower for welding fume extraction with NO DUCTWORK

marvel

- The most complete line of vertical saws in the industry.
- Full line of horizontal saws from both Marvel and Amada.

8-Mark-III

380 Automatic Saw

GLADTECH 2026
April 15th & 16th

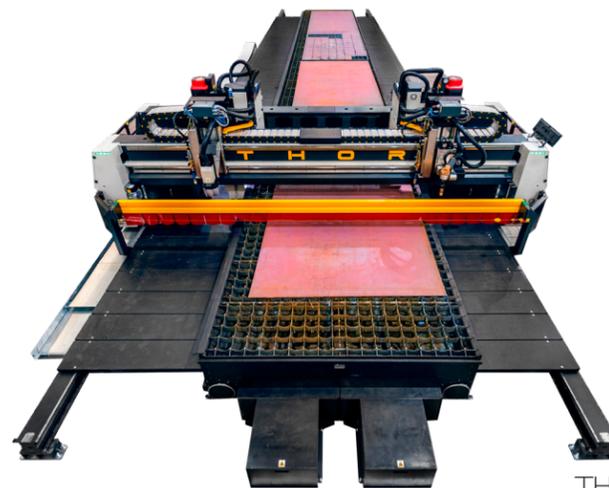

130-3100 Ultra

- Multiple Safan electric press brakes
- Safan R-Brake

R-Brake

THOR

Advanced Plate Processing Systems

TECOI's THOR is the most versatile plate processing station on the market, allowing the production of parts with multiple operations such as milling, drilling, tapping, countersinking, marking, etc.

First completely electric plate roll series in the world.

CNC Electric Plate Roll

Ercolina's affordable tube benders and fabricating machines are designed to reliably and accurately produce your bending applications. As a result, their machines will increase profit, as well as improve product quality and finish.

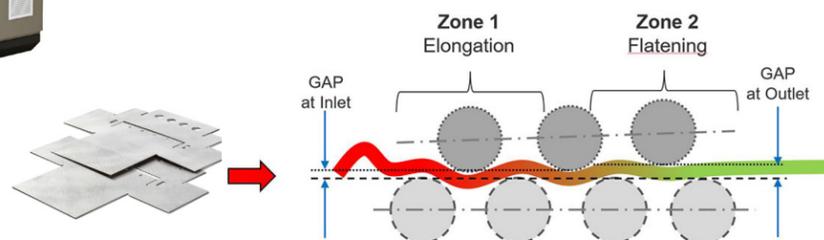

TB60

CE50

Precisely level and relieve stress from sheets and part blanks. Your downstream production processes will benefit from higher quality flat parts reducing forming, fixturing and welding times dramatically. All while providing better finished parts!

Schroeder Group is The World Leader in the manufacture of CNC Folding Equipment. They pride themselves in offering leading bending solutions for optimal sheet metal processing.

PowerBend Industrial

Swift-Cut

CNC Plasma
Cutting-edge plasma cutting machines. Easy to use software in a Pro series for a more affordable solution, and the XP series for more robust applications.

Liberty Systems

Liberty nitrogen generators, mixers and high performance air systems.

Aluminum Saw

- Full range Manual and Semi-Automatic Miter Band-saws
- High Speed Aluminum Saws and Machining Centers

Scotchman

Scotchman will have an ironworker, angle roll, ram bender and saw with gauge.

Haeger By PEM

824 One Touch 5 eLite

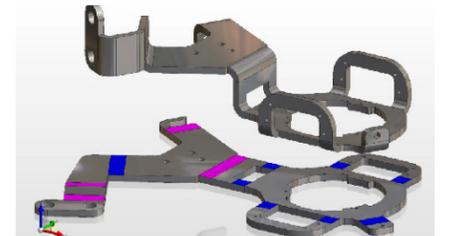

ITEC

Startechnology
Evo Bend 800

RADAN BY HEXAGON

Vertically integrated software.
